DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Manning (US Patent 4,974,649) or Leonardi (US Patent 5,819,827).

The device of Manning or Leonardi reads on the structural elements of the claims, including a countersunk bore (fig. 12 and fig. 14 or fig. 5, respectively), and a threaded bore (fig. 12 and 14 or fig. 5, respectively). The examiner takes the position that the pocket of Manning or Leonardi is symmetric with respect to a line bisecting the bores. Also, it should be noted that a second slot and pocket of either Manning and Leonardi reads on the structural limitations of claims of 13-18.
